

Hopewell Crest Students Soar at Perennial Math Contest

Hopewell Crest School students, in both fifth and seventh grade, participated in a Perennial Math Competition at Rowan College at Burlington County on Saturday, April 22nd. The tournament was for grades three through eight; it allowed students to compete for individual and team awards for each grade level. The following fifth grade and seventh grade students represented Hopewell Crest School: Adriana Federico, Gabby McMahon, Hailey Brown, Katie Smith, Daniel Sciuлло, Nathaniel Clark, Kael Jespersen, Emilee Price, Kimmy Perez, and Caroline Kennedy. The competition consisted of two events. The first event was an individual test which was a thirty-minute session with fifteen problems. In the seventh grade division of this event, Kael Jespersen was awarded 1st place and Nathaniel Clark tied for 2nd place. The second event was a twenty-minute session with ten word problems, and the team was able to work together. Hopewell Crest seventh graders were awarded 1st place, in their division. It goes without saying that these Hopewell Crest fifth and seventh graders brought honor to themselves, their families, and their school. Go Hawks!
